

A VERY OLD BENCH

SKU: GD1107

£0.00

A very old wooden bench, possibly a leather makers workbench. A wonderful pitch pine top full of character, the frame has mortise and tenon joints with handmade wooden dowels.

This old bench shows evidence of various evolution, we salvaged it from a 1970's derelict workshop in mid-wales, at some point in its life the original wooden top had been turned over due to its age and wear so we decided to turn it back to its original side for its next chapter!

The base and frame is painted in Farrow & Ball

The overall dimensions are as listed, the internal drawer size is;

W24cm x D35cm x H12cm / W9 3/8" x 13 3/4" x 5"

Note: The wooden boxes pictured are not included but are available separately.
