

EXCLUSIVE HAND BLOWN DESIGNER GLASS TABLE 'TEJA' SILVER - THE IVANA STEINER COLLECTION

SKU: GDS1000

£11,995.00

The TEJA Silver hand blown glass side table by Vienna based Architect and award winning Designer Ivana Steiner. The TEJA has an apple shaped design, it is circular and has a flat top surface which curves and tapers to the base.

This unique hand made table was designed and commissioned exclusively by Ivana, the table is crafted using traditional hand-blown method, the sheer size and weight of the piece means that it is at the very limits of what can be manufactured, which means these are made in very limited numbers.

These exclusive designer pieces provide exceptional reflective light and depth, each piece uniquely formed which means no individual piece is identical, each having naturally formed bubbles and waviness that is often seen in traditional glass making. The end result is a spectacular contemporary yet characterful piece of furniture. The silver finish is achieved by means of silver granules that line the inside of the glass table and creates the silver visual reflection to the outer surface. The tables are around 10mm thickness and very heavy.

We currently have 1no TEJA in Silver available, more pieces can be made-to-order, please get in touch with any enquires.

As seen from the photos, they are very difficult items to photograph due to their reflective surface, we have tried to capture some of the surface finish of the piece so please study them carefully. Please note that the room set photo is a rendered 3D image for scale, All other photos are actual product images.

ADDITIONAL INFORMATION

Age	New
Material	Glass
Origin	Vienna
Dimensions	H50cm x W54cm / H20" x W21.25"
