

## **LARGE 1970S CONCRETE GARDEN PLANTER WATER TROUGH**

**SKU:** GD1565

**£1,500.00**

A large Mid Century Concrete Planter, freshly salvaged.

Good scale at 2m in length, this will make a fantastic garden feature, the trough does hold water so could be used as a water feature.

Due to its weight it is ideal for use with larger plants / trees where stability is required.

The concrete is in good structural condition, the piece has several small losses and marks and has a great overall aged patina, ideally suited to a mature garden setting where it will blend in perfectly. If a cleaner look is required then the piece could be cleaned or indeed polished to provide a modernist aesthetic.

A modernist piece if your looking for that 1970s Willy Guhl style - not at all attributed to the designer but certainly of its period.

## ADDITIONAL INFORMATION
