£0.00

A 1970s designer piece by Gimson and Slater, England. Gimson and Slater were a company making high end contemporary sofas and chairs in the 1960s and 1970s. This Tan coloured patchwork leather is typical of their unique design of the late 60s early 70s period. A striking looking chair and very comfortable with generous seat. Matching footrest completes the look.

High quality patchwork leather, all cushions removable revealing its unique design.

In very good condition, some sun fading to the leather as can be seen in the photos but overall a great looking set.
