

MODERNIST POLISHED STONE CONCRETE BENCH SEAT WITH AGED PATINA

SKU: GD1580

A modernist concrete bench seat with a lovely aged patina, suitable for interior or exterior use, the bench seat has great form and colour, and would make a wonderful feature piece. The seat top (middle section) has a polished sealed surface with both D-End pieces having a more textured natural concrete finish.

The piece will add texture and character to a space, the ends have a an aged patina with small areas of loss with rust spots coming through - this gives the piece a great look.

A heavy item, in three sections. The piece would need a level stable floor or if placing outside a level ground. A very decorative piece with good proportions, multiple uses for home or garden.
